MEDIA RELEASE

Sanli wins S$72.67 million PUB contract for new disinfection systems at Johor River Waterworks

- With the award of the new contract, the Group's orderbook increases to S$329.8 million

SINGAPORE, 15 July 2021 – SGX-Catalist listed Sanli Environmental Limited ("**Sanli**", "the **Company**", "三立环境有限公司" and together with its subsidiaries, the "**Group**"), one of Singapore's leading environmental engineering companies, is pleased to announce that it has been awarded a S$72.67 million contract from the Public Utilities Board ("**PUB**").

The PUB contract is for the construction and commissioning of new disinfection systems at Johor River Waterworks ("**JRWW**"), located at Kota Tinggi, Johor, Malaysia (the "**Contract**").

Mr Chua Teck Huat ("蔡德发"), Chief Executive Officer of Sanli commented: "*Amidst the challenges of the COVID-19 pandemic, the contract is a welcome win for us. It also a reflection of the confidence that PUB has in us for delivering critical water treatment installations to ensure the sustainable supply of water to Singapore.*"

With the award of the Contract, the Group now has an order book of S$329.8 million which is expected to be completed by early 2026.

Barring any unforeseen circumstances, the Contract is expected to have a positive impact on the net tangible assets and earnings per share of the Group for the financial year ending 31 March 2022.

End.

About Sanli Environmental Limited

Listed in 2017 on the SGX-Catalist, Sanli Environmental Limited ("Sanli") is an environmental engineering company in the field of water and waste management. Sanli's expertise is in the design, supply, delivery, installation, commissioning, maintenance, repair and overhaul of mechanical and electrical equipment as well as process, instrumentation and control systems in wastewater treatment plants, water reclamation plants, NEWater plants, waterworks, service reservoirs, pumping stations and incineration plants.

The Company's business is divided into two main business segments. The Engineering, Procurement and Construction segment provides engineering, procurement and construction services within the field of water and waste management including process upgrading of existing water treatment plants, upgrading of pumping station capacities, replacement of aged mechanical and electrical equipment, and design and build of various treatment process systems. The Operations and Maintenance segment provides corrective and preventive maintenance services to ensure reliability and minimal disruptions to its customers' operations.

Backed by its strong engineering capabilities, Sanli has the ability to integrate mechanical, electrical and process engineering expertise to provide customised, cost- and time-efficient integrated engineering solutions and services to its customers.
