Sanli boosts order book by S$54.3 million with new contracts

- **A reflection of customers' confidence in the Group's capabilities**
- **Order book grows to S$134.4 million**

SINGAPORE, 15 November 2018 – Sanli Environmental Limited ("**Sanli**" and together with its subsidiaries, the "**Group**"), an environmental engineering company with more than ten years of experience and over 1,000 completed projects in the field of water and waste management under its belt, has announced that it has secured new Engineering, Procurement and Construction ("**EPC**") and Operations and Maintenance ("**O&M**") contracts worth a total of S$54.3 million (the "**Contracts**"). These contract wins will bolster the Group's order book to S$134.4 million. Under the EPC contracts, Sanli will supply, install, commission and test, equipment at water reclamation plants. Under the O&M contracts, Sanli will provide maintenance services for drainage, sewerage and aeration systems.

The most significant win was a sub-contract from Boskalis / Penta-Ocean Joint Venture, for the supply and installation of mechanical (water management) package works at Pulau Tekong. The Boskalis / Penta-Ocean Joint Venture is the main contractor for the landmark polder development project at Pulau Tekong[1]. This sub-contract is expected to contribute to Sanli's revenue for the next four years from the financial year ending 31 March 2019 ("**FY2019**").

[1] *This land reclamation project will add about 810 ha of new land at the north-western tip of Singapore's Pulau Tekong island. The project works include the construction and reinforcement of a 10-kilometre long dike surrounding the polder, earthworks and the construction of a network of drains, water pumping systems and canals. Construction of the polder is expected to be completed in April 2022.*

Mr Sim Hock Heng, Chief Executive Officer of Sanli said, "*We are greatly encouraged by these recent contract wins, especially amidst the current challenging operating environment. This reflects the level of confidence our customers have in our capabilities. The Group will continue to leverage on our established track record to secure more contracts and grow the business further.*"

The Contracts are expected to contribute to the Group's revenue from FY2019.

~~ END ~~

About Sanli Environmental Limited

Sanli is an environmental engineering company in the field of water and waste management. It has more than ten years of experience and over 1,000 completed projects under its portfolio.

The Group's expertise is in the design, supply, delivery, installation, commissioning, maintenance, repair and overhaul of mechanical and electrical equipment as well as instrumentation and control systems in wastewater treatment plants, water reclamation plants, NEWater plants, waterworks, service reservoirs, pumping stations and incineration plants.

The Group has two main business segments: **Engineering, Procurement and Construction** ("**EPC**") and **Operations and Maintenance** ("**O&M**"). Under its EPC segment, Sanli provides services within the field of water and waste management, including process upgrading of existing water treatment plants, upgrading of pumping station capacities, replacement of aged equipment, and design and build of various treatment process systems. Through its O&M segment, the Group provides corrective and preventive maintenance services to ensure reliability and minimal disruptions to customers' operations.
